

About PAL

Philippine Airlines first took to the skies on March 15, 1941 using a five-seater Beech model 18 aircraft.. That flight earned for PAL the distinction of being Asia's first airline.

Since then, PAL etched numerous firsts in Philippine commercial aviation.

PAL's trend-setting service on ground and inflight continues to be the benchmark in airline operations and customer service for the past seven decades.

PAL keeps in step with technological advancements to maintain airline standards, such as acquiring the latest aircraft types equipped with luxurious cabin amenities.

Passengers enjoy generous baggage allowance, spacious legroom, inflight entertainment and connectivity, sumptuous inflight dishes, quality products and services from partner establishments for frequent flyers (Mabuhay Miles members) and many more.

Today, PAL flies to 43 international and 30 domestic destinations using 83 airplanes. PAL's hub of operations are in Manila, Cebu, Clark, Kalibo and Davao.

PAL international route network extends as far as New York in the east and London in the west.

PAL is the first Philippine-based carrier certified safe by the International Air Transport Association (IATA), and only airline with Business Class in domestic service.

PAL has a new corporate vision - to be a five-star rated airline. To support this goal, a new branding campaign – Heart of the Filipino – embodies the warm and caring service that showcases the best of the Philippines and Filipinos.

PAL is currently expanding its route network, modernizing its fleet of airplanes and constantly upgrading its line of products and services, both inflight and on ground.
